

SLC

Guard locking safety switch

The new generation of safe mechanical guard locking switches

Surely. Exactly the right solution.

With machines, it is imperative to ensure that there is no access or entry to the dangerous area after the process has been switched off. If, for example, we think of a large flywheel mass such as rotating saw blades, the machine operator shall have no access to the dangerous area until the dangerous movement has come to a complete standstill. Safety switches with guard locking such as the SLC ensure that safety guards, doors and other covers remain closed as long as a dangerous condition persists.

Did you know that ...

... an interlocking device with guard locking combines two safety functions in one product?

1. Safe monitoring of the door position
2. Safe monitoring of the guard locking

MANY FEATURES AT A GLANCE

- Lightweight yet robust: Hybrid of metal and plastic
- Flexible contact assembly
- Integrated manual release
- Symmetrical design
- Five actuating positions
- Rotatable head ($4 \times 90^\circ$)
- Fail-safe guard locking system
- Optional emergency exit
- Optional emergency release
- M12 connector as an option

Thought through and cost-effective. Economical and user-friendly.

The coded SLC has been re-thought and is a further development from BERNSTEIN with optimised functions in many respects. During development, it was important to reduce the functions to the essentials, to consider the primary requirements of the customers and, in particular, to keep an eye on cost-effectiveness.

Thus, for example, mechanically highly stressed components – such as the rotating head – are made of metal. This makes it extremely robust and durable. The plastic housing, on the other hand, is light and functional.

A variant with M12 plug connector allows a particularly simple connection to the machine. Another user-friendly feature is the possibility of flexible contact assembly: The contact combination of NC and NO for monitoring the door position and the guard locking can be freely combined at the factory.

The specific requirements of our customers can be discussed and considered individually. Should it be necessary to open the guard locking when the machine is switched off – e.g. for maintenance work – the SLC is equipped with an auxiliary release as standard, which can be operated with an Allen key.

The SLC

The modular concept

Actuator flex (ACF-1)
Designed to compensate for a slight vertical/horizontal offset.

Actuator straight (ACS-1)
Proven standard model among the actuators.

Actuator cross (ACC-1)
for vertical / horizontal mounting.

Manual release (standard)
Possibility of manually unlocking the switch using a tool – for example for maintenance work.

Guard locking principles

Spring-To-Lock

Guard locked by spring force. To unlock, the solenoid needs to be energised.

Power-To-Lock

Guard locked by energised solenoid. To unlock, the energy needs to be switched off.

New symbol according to ISO 14119 for the interlocking contact

Contacts labelled with this symbol monitor the guard locking position. Since the SLC is a fail-safe guard locking switch, it is sufficient to integrate only these into the safety circuit.

In addition to the manual release, the SLC offers further functions that enable quick intervention if required.

Emergency release

As a ready-to-use switch or as an accessory, mounted on the front of the SLC, enables immediate opening from outside the dangerous area.

Emergency exit

Optionally mounted on the rear of the SLC, the emergency exit enables immediate opening from within the dangerous area.

M20 cable glands

Possible on the sides and from below.

Optionally available with M12 connector.

Product range

SLC and actuator

Product range							
Article number	Designation	Guard locking principle	Supply voltage of solenoid	Contact configuration		Emergency exit	Connection type*

6018200005	SLC-F-230-11/11-R4	Spring	230 V AC	1 NC / 1 NO	1 NC / 1 NO	No	Standard
6018200004	SLC-M-110-11/11-R4	Magnet	110 V AC	1 NC / 1 NO	1 NC / 1 NO	No	Standard
6018200006	SLC-M-230-11/11-R4	Magnet	230 V AC	1 NC / 1 NO	1 NC / 1 NO	No	Standard

* 3 × M20 thread with closed housing wall

Actuators

Product selection

Article number	Designation
3911742390	ACS-1

Mechanical data

Actuator	Stainless steel (Niro)
----------	------------------------

Minimum actuating radius R_{min}	800 mm
------------------------------------	--------

Product selection

Article number	Designation
3911742391	ACF-1

Mechanical data

Actuator	Stainless steel (Niro)
----------	------------------------

Gehäuse	GD-Zn
Minimum actuating radius R_{min}	400 mm

The actuator can be aligned with the mask of the SLC head opening by pressing it in and turning it 90°.

Product selection

Article number	Designation
3911742392	ACC-1

Mechanical data

Actuator	Stainless steel (Niro)
----------	------------------------

Minimum actuating radius R_{min}	600 mm
------------------------------------	--------

The actuators must be ordered separately.

Accessories

for immediate release
in case of emergency

Emergency release
for immediate opening
from outside the dangerous
area in case of an emergency.

Article number	Designation	Description
6051101003	EMR-F-1	Emergency release front
6051101004	EMR-B-1	Emergency release back
6051201006	ESCR-B-1	Basic set for emergency exit
6051201009	ESCR-B-2	Basic set for emergency exit with bolt BF1-SLC ES
6051201007	ESCR-20-1	Extension module emergency exit * Length: 20 mm
6051201005	ESCR-40-1	Extension module emergency exit * Length: 40 mm

Emergency exit
enables immediate
opening from inside
the dangerous area in
case of an emergency.

Emergency unlocking
Basic set
ESCR-B-1

Extension module *
20 mm
ESCR-20-1

Extension module *
40 mm
ESCR-40-1

* Base set required to use the expansion modules.

SLC sliding handle

For robust applications

The handle for the SLC combines various functions:

- Ergonomic handle to open the door
- Prevents lateral forces onto the switch head
- Prevents using the switch head as an end stop
- Guarantees optimum actuator insertion

These properties simplify fault exclusion and enable PL d to be achieved in the door monitoring and locking function.

The variant with emergency exit (BF1-SLC ES) includes an additional handle to be able to open the door from within the danger area when using the function. This requires at least the basic set (ESCR-B).

Article number	Designation	Description
6050101002	BF1-SLC	Door bolt for SLC
6051201008	BF1-SLC ES	Door bolt for SLC with escape release

Technical data

SLC safety switch

Electrical data

- **Contacts**

Rated operational voltage U_e : 240 V AC / 24 V DC

Utilization category:

AC-15, Ue / Ie 240 V / 1,5 A (B300)

DC-13, Ue / Ie 24 V / 1,5 A; 250 V / 0,11 A (R300)

- **Solenoid**

Operating voltage: 24 V AC / DC or 110 V AC
or 230 V AC

Mechanical data

- Enclosure: Thermoplastic, glass fibre reinforced (UL 94-V0)
- Cover: Thermoplastic, glass fibre reinforced (UL 94-V0)
- Operating device: Metal
- Latching force: 1500 N (EN ISO 14119)
- Ambient temperature: -25 °C to +55 °C
- Switching principle: 4 slow-action-contacts
- Protection class: IP67

Safety data

- B_{10D} : 2×10^6 cycles (EN ISO 13849-1)
